Informations regarding compliance to REACH (1907/2006/EC)

Dear Sir or Madam

According to the terminology of REACH, BIBUS SINDBY A/S is a distributor of „articles which, under normal and foreseeable conditions of use, do not release chemical substances or preparations“. The production and assembly activities by BIBUS SINDBY A/S are activities as „downstream user“. The supplying of „articles“ as well as the activity as „downstream user“ of the products from our suppliers do not require registration obligations according to REACH.

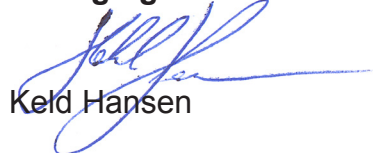

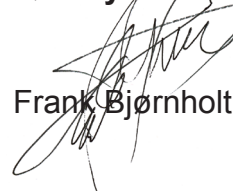

We have contacted our suppliers regarding this topic. The substances and/or preparations which build the products have been pre-registered and notified to the European Chemicals Agency ECHA. Based on the answers from our suppliers we can assert that with high probability there will be no interruption of availability of the products from BIBUS SINDBY A/S.

In the domain of 3D-printing the consumables can not be categorised as „articles“ but do represent „preparations“. It was assured that these consumables have been registered as „preparations“ on substance-level by the respective suppliers.

BIBUS SINDBY A/S will comply with further future information duties in the supply chain, especially the communication of new findings about substance hazards and market restrictions.

If you have further questions about the REACH compliance of our products we kindly ask you to contact our REACH responsible Alma Smajic by writing to asm@bibus.dk

Best regards
BIBUS SINDBY A/S
